

Outpatient Clinic Letter

Dear Dr Diane Newman,

I reviewed William Jennings (DOB: 13/10/1955) in the Cardiology outpatient clinic on 28 February 2026.

PRESENTING COMPLAINT

William Jennings presented with exertional chest pain and shortness of breath on minimal exertion for the past 3 months.

MEDICATIONS

Amlodipine 5 mg once daily

Atorvastatin 40 mg at night

Aspirin 75 mg once daily

ASSESSMENT

Clinical findings are consistent with stable angina. ECG shows sinus rhythm with no acute changes. Troponin negative.

PLAN

1. Arrange exercise tolerance test
2. Start GTN spray PRN
3. Review in 6 weeks

Yours sincerely,
Dr Abdul Hopkins
Consultant Cardiologist
