Dear Dr. Thompson,

Re: Ms. Jane Smith DOB: 15/03/1975
24 Elm Street, St. Helier, Jersey, JE2 3PQ

Thank you for agreeing to consult with Ms. Smith regarding her multiple gallstones. It would be most helpful to have your expert opinion regarding further future management along with how urgent this is. Any recommendations regarding location and specialists for surgery would also be welcome. We will then conduct our own due diligence before arranging consultations. Thank you very much.

Yours sincerely,

Dr. V. Patel

Diagnostic Imaging Report

PATIENT:	REFERRING CLINICIAN:
Name: JANE SMITH Date of Birth: 15/03/1975 Hospital Number: 1044892 NHS Number: 8203456712 Address: 24 Elm Street, JE2 3PQ, JERSEY	Dr. V. Patel Institute of Preventative Medicine Floor 5, The Amphenol Business Complex Thanet Way

Clinical Indication: MRCP, MRI Head, MRA Head
Spirometry: Booked on 19/11 at 10:00 am

Findings (MRCP):
Multiple gallstones in the gallbladder, there is one dominant gallstone within the gallbladder measuring 2.8 cm, there does not appear to be obstruction of cystic or common bile duct, nor do I see a common bile duct stone. There is no intrahepatic biliary dilatation. The pancreatic duct is also normal in calibre. No suspicious hepatic parenchymal lesion. Normal spleen, adrenals, kidneys and pancreas.

Findings (MRA Head):
Time-of-flight angiography demonstrates intact circle of Willis, no evidence of dissection or stenosis. 3 mm left MCA, M1 segment aneurysm just at the genu, where it divides into inferior and superior trunks. The cerebral hemispheres, basal ganglia, brainstem and ventricular system appear normal. Small mucous retention cyst in the left maxillary sinuses. No micro haemorrhages. No evidence of acute territorial infarction.

Conclusion:
3 mm left MCA aneurysm. Multiple uncomplicated gallstones.

Examination: MRCP, MRI Head, MRA Head
Accession: 100004112891,100004112892,100004113205
